Dear Valued Evercare (dba oneCARE) Customer:

This letter provides notification of a price adjustment on the oneCARE product line effective July 7, 2008.

Over the past several years Evercare/oneCARE has experienced significant rising cost in raw materials and transportation without passing on price increases to our retail partners. We continue to diligently work with our suppliers to maximize our cost efficiencies while maintaining the premium performance of our products. However, more recently, Evercare/oneCARE's raw material and distribution costs have escalated to the point that we have no choice but to raise our prices.

For perspective, below please find a list of raw material costs and their respective increases over the past several months.

World Market Commodity Pricing Impacting oneCARE's Business (9/15/07 v 3/27/08)

Key Factors	9/15/07	3/27/08	Delta	% Change
Oil (\$s/barrel)	\$79	\$105	\$26	33%
Polyethylene (price/pound)	56.1¢	61.9¢	5.8¢	10%
Polypropylene (price/pound)	60.5¢	70.0¢	9.5¢	16%
All Types of Resin (price/pound)	59.3¢	66.7¢	7.4¢	12%

Given those factors, we are forced to take a 5% price increase effective with orders placed beginning July 7, 2008.

We appreciate your understanding of our present situation and look forward to the continuation of our highly valued business relationship with you.

Thank you for your continued support.
