January 29, 2008

**REMINDER:
2-21-08****DEAR CUSTOMER:**

Finally, some relief on the resin side. The 8.0% resin increase, scheduled for January 1st, 2008 and that we were to implement on February 3, 2008, has been split in two. The resin producers were successful in increasing prices by 4.0% in January and delayed the other 4.0% until February 1st, 2008.

→ In light of this new information, First Film Extruding is delaying the implementation of the whole increase until March 3rd, 2008. We understand all the difficulties you face during a price change so we felt it would be better to make only one adjustment of 8.0% in March as opposed to two of 4.0% in successive months on all our garment films and bags. This delay will also provide us time to better understand the market dynamics.

We are honouring our pledge of watching the resin situation and providing you, our customer, with the best possible value proposition.

Very truly yours,

FIRST FILM EXTRUDING, LLCLouis P. Gouron
Vice-President
