June 17, 2008

TO OUR VALUED CUSTOMER:

All facets of the economy are being adversely affected by the continued escalation of energy costs. All of our resin suppliers have announced and are starting to implement further increases for June and July. In addition to the resin increases, we have also sustained significant increases in the costs of transportation, utilities and manufacturing.

As a result, First Film Extruding will increase the price of all of our industrial plastic films and bags, as well as all of our garment film products by **11.0%** on all orders placed on or after **July 15, 2008**. This 11% is comprised of 8.0% of raw material and 3% general manufacturing and transportation increase. This increase is in **addition to the 4.0%** increase slated for June 24, 2008; for a total change of 15.0%. This addresses the second and third resin increases and incremental operating costs. All orders must be limited to a normal monthly usage and for immediate shipment.

The petrochemical volatility will continue to drive prices up. An additional increase is on the table now and will be addressed at a later date. We will continue to monitor the situation closely, and provide you, our customer, with the best value we can.

Thank you for your continued support and understanding.

Respectfully yours,

FIRST FILM EXTRUDING, LLC
