ATTENTION: Purchasing Agent**RE: PRICE INCREASE**

We recently purchased new supplies of chemicals, plastics, and caps for our line of products. Since September 2007 we have seen a 5.8% price increase in these items. With the sharp increase in crude oil prices, our suppliers are having a difficult time keeping up with the prices. We are using every effort available to keep our prices down.

However, we must adjust our prices at this time to reflect these new increases; however, our price increase will only be 3.7%. Therefore, we are notifying you of a price increase effective May 16, 2008. We may have to adjust our prices again around September 2008.

We will accept all purchase orders on or before Friday, May 16, 2008 at the old prices. Please note our new prices in your records. We value your business and appreciate your continued support and interest in our NCP products. A copy of the new price schedule follows this page.

Respectfully yours,

*Robert S. Neuhaus*Robert S. Neuhaus
