RE: Feedstock and Solvent Price Announcement

Dear Mr. Farrington:

Effective immediately, or as permissible by contract, PPG is increasing all off-list prices on all grades of **Methylene Chloride** by US\$0.05 per pound, **Perchloroethylene** by US\$0.04 per pound, and **Trichloroethylene** by US\$0.04 per pound.

This price increase is necessitated by continuing energy, raw material, and logistics' cost increases.

All other terms and conditions of sale remain unchanged.

If you have any questions regarding this price change, please contact your local PPG sales representative. PPG appreciates the opportunity to supply your feedstock and solvent requirements and will strive to earn your business everyday.

Yours truly,

Robert E. Olson  
Regional Sales Director – East
