**RE: Solvents and Feedstocks Price Announcement**

Dear Ken:

Effective immediately, or as permissible by contract, PPG is increasing all off-schedule and list prices on all grades of **Perchloroethylene** and **Trichloroethylene** by US\$0.04 per pound (\$Can 0.09/ kg) and **Methylene Chloride** by US\$0.07/lb. (\$Can 0.16/kg.).

This price increase is necessitated by a tightening supply/demand balance.

All other terms and conditions of sale remain unchanged.

If you have any questions regarding this price change, please contact your local PPG sales representative. PPG appreciates the opportunity to supply your feedstock and solvent requirements and will strive to earn your business everyday.

Sincerely,

Howard Wright  
Regional Sales Director, Eastern Area
