Re: DF-2000 Fluid Price Adjustment Effective June 16, 2008

ExxonMobil Chemical have announced a further increase in the price of DF-2000 Fluid. This increase is again in addition to the recent adjustments announced for May 15 and June 1. Exxon Mobil are reporting that values for crude oil and fuel products, such as petroleum distillates, are at record levels and that these values continue to escalate beyond their near-term estimates. Today's crude prices are more than double what they were one year ago. During 2008, crude oil prices have reached levels 40% higher than year end 2007 resulting in unprecedented and unexpected feedstock escalation and making this adjustment necessary.

A revised Confidential Distributor Price Schedule is attached. All other terms and conditions remain unchanged.

We greatly appreciate your understanding and continued support during this difficult time. Should you have questions, or require further information, we would be pleased to hear from you. Thank you for your business.

Sincerely,

R.R. Street & Co. Inc.
