1. PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: Sodium Perborate Tetrahydrate

SYNONYMS: Sodium Perborate, Tetrahydrate Perborax, Hydrate of Peroxometaborate

GENERAL USE: Used in active oxygen-type laundry bleaches, plastic destaining and dishwashing compounds, coffee-stain removers, denture cleaners, neutralizers for cold-wave preparations, and the preparation of oxidizing solutions for bleaching or other purposes. 2. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:

White, odorless, crystals
Oxidizer.
Contact with combustibles may cause fire.
Under fire conditions product may decompose releasing oxygen that intensifies fire.
Deluge container with water at safe distance or in protected area.
Corrosive to eyes.

POTENTIAL HEALTH EFFECTS:

Airborne dust may be irritating to eyes, nose, throat and lungs. No significant long term inhalation hazard; irritation usually subsides after exposure ceases.

3. COMPOSITION / INFORMATION ON INGREDIENTS

Chemical Name	CAS#	Wt. %	EC No.	EC Class
Sodium Perborate Tetrahydrate	10486-00-7	96 - 98	None	Not classified as hazardous

4. FIRST AID MEASURES

EYES:

Immediately flush with water for at least 15 minutes, lifting the upper and lower eyelids intermittently. See a medical doctor or ophthalmologist immediately.

SKIN:

Wash with plenty of soap and water. Get medical attention if irritation occurs and persists.

INGESTION:

Rinse mouth with water. Dilute by giving 1 or 2 glasses of water. Do not induce vomiting. Never give anything by mouth to an unconscious person. See a medical doctor immediately.

INHALATION:

Remove to fresh air. If breathing difficulty or discomfort occurs and persists, contact a medical doctor.

NOTES TO MEDICAL DOCTOR:

May be corrosive to eyes and mucous membranes. Emesis or gastric lavage must consider possible esophageal perforation due to re-exposure to corrosives. Decomposition products may include peroxide (irritant) and borate. Systemic effects are unlikely, but would be those of boric acid for which treatment is symptomatic and includes decontamination, support of circulation, correction of fluid-electrolyte disturbances, control of convulsions and protection of kidneys if large borate loads are encountered.

5. FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA:

Water, water fog

FIRE / EXPLOSION HAZARDS:

Decomposes with liberation of heat and oxygen which may intensify fire in combustible surroundings.

FIRE FIGHTING PROCEDURES:

For fires involving this material, do not enter any enclosed or confined fire space without proper protection equipment such as a self contained breathing

apparatus.

FLAMMABLE LIMITS: Non-combustible
SENSITIVITY TO IMPACT: Not available
SENSITIVITY TO STATIC DISCHARGE: Not available

6. ACCIDENTAL RELEASE MEASURES

RELEASE NOTES:

Material should be put into an approved DOT container then diluted with large quantities of water and disposed of according to the methods outlined in Section 13, "Disposal Considerations". Return product to original container.

7. HANDLING AND STORAGE

HANDLING:

Avoid contact by using personal protective equipment. Use respiratory protective equipment when release of airborne dust is expected.

STORAGE:

Store material in a cool, dry, clean area. Do not store near or expose to heat sources i.e., steam pipes, radiant heaters, hot air vents etc. Avoid contact with reducing agents and moisture.

COMMENTS:

VENTILATION: Provide mechanical general and/or local exhaust ventilation to prevent release of dust into work environment. If ventilation is inadequate or not available, use dust respirator and eye protection.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS:

Provide mechanical local exhaust ventilation to prevent release of dust into the work area. If release is expected use respiratory protection.

PERSONAL PROTECTIVE EQUIPMENT

EYES AND FACE: Chemical goggles or face shield.

RESPIRATORY: Use approved dust respirator with full face piece.

PROTECTIVE CLOTHING: Long sleeve shirt, impervious apron or clothing. Rubber or neoprene footwear.

GLOVES:

Rubber or neoprene gloves. Thoroughly wash the outside of gloves with soap and water prior to removal. Inspect regularly for leaks.

12. ECOLOGICAL INFORMATION

ECOTOXICOLOGICAL INFORMATION:
No data available for the product. Although boron is an essential micronutrient for healthy growth of plants, it can be harmful to boron sensitive plants in higher quantities. Care should be taken to minimize the amount of borate product released to the environment.
Boron naturally occurs in seawater at an average concentration of 5 mg b/l. In lab studies acute toxicity (96-hr. LC50) for underyearling Coho salmon (*Onchorhynchus Kitsutch*) in seawater was determined as 40 mg b/l. Boron in freshwater is generally less than 1 mg b/l.

Rainbow trout (*S. Gairdneri*) 24 day LC50 = 150.0 mg b/l.
36 day NOEC-LOEC = 0.75 to 1 mg b/l.

CHEMICAL FATE INFORMATION:

Boron is naturally occurring and ubiquitous in the environment. Product will decompose in the environment to natural borate. Product is soluble in water and is leachable through normal soil.

13. DISPOSAL CONSIDERATIONS

DISPOSAL METHOD:

Dissolve in water to allow the release of oxygen and dispose via a treatment system in accordance with local, state and federal governmental agencies regulations. Contact appropriate regulatory agency prior to disposal.
