Winston-Salem, NC 27107

Dear David,

As you know the chemical industry is faced with higher energy prices, as well as the ethanol boom which is affecting phosphate demands and the costs of chlorine and caustic.

Due to this on going raw material price increases, as well as rising freight charges, our costs have risen, Reluctantly, we find that we must raise our prices to recover these increased expenses. Beginning June 1, 2008 the following price schedule will be in effect.

There is some good news to report.....we are in the final testing phase for 2 liquid detergents and 2 powder detergents that eliminate NPE's (nonylphenol ethoxylites). As soon as we are satisfied with the final results we will make them available for you to sell these environmentally friendly detergents.

Unichem appreciates your business and looks forward to our continued association.

Sincerely yours,

A handwritten signature in blue ink that reads 'Nowell Korey'.
