

U.N.X. DISTRIBUTOR
MEMORANDUM

August 8, 2008

TO: ALL U.N.X. DISTRIBUTORS
FROM: U.N.X. CORPORATE

UPCOMING GENERAL PRICE REVISION

This is to inform our distributors of a General Price Revision effective August 26th.

The costs of raw material commodities have increased at a record rate. The frequency and magnitude of the increases have been unparalleled in our history. The cause is runaway inflation due to the high cost of energy.

Where, traditionally, chemical raw materials might increase 3% to 6% annually, today we encounter overnight increases ranging from 10% to 35%! It realistically is not possible for any blender to maintain margins in the face of such runaway inflation. Despite the chaotic cost conditions in the marketplace, U.N.X. is determined to protect the competitiveness of its distributors.

As usual, all orders received for immediate delivery by the end of business on the 25th will be priced at the old prices.
