RE: Feedstocks & Solvents Price Announcement

Dear Ken:

Effective immediately, or as permissible by contract, PPG is increasing all off-schedule and list prices on all grades of Perchloroethylene, Trichloroethylene, and Methylene Chloride by US\$0.05 per pound, and by 0.12 \$Can / kg.

This price increase is necessitated by continuing raw material cost increases and a tightening supply/demand balance.

All other terms and conditions of sale remain unchanged.

If you have any questions regarding this price change, please contact your local PPG sales representative. PPG appreciates the opportunity to supply your feedstock and solvent requirements and will strive to earn your business everyday.

Yours truly,

A handwritten signature in black ink that reads 'Robert E. Olson'.
